WALL 2 explains the steps in a process. I can name the steps in a process. I can draw the steps in a process. I can write to explain the pictures. I can add scientific labels to my diagrams.

How a Bean Grows

1. First you plant a seed in the soil. ✓
2. Water the soil. ✓
3. A shoot that the sun shines on it again and the plant gets light. ✓
4. Then a flower appears and bees come. ✓
5. In the end both come and you can get them a plant more. ✓

Plants

Bean diary 2021
It has been sun days since we planted our bean seeds. So far, nothing has changed.

Thursday 11th March 2021

WALL 3 explains the steps in a process. I can name the steps in a process. I can draw the steps in a process. I can write to explain the pictures. I can add scientific labels to my diagrams.

How a Bean Grows

1. First you plant the seed in the soil then you water the soil. ✓
2. The bean grows tops and a stem and put it in a sunny spot. ✓
3. Then the stem grows leaves and the roots get longer and they grow. ✓
4. Then the flower grows and seeds grow on the flower. ✓
5. Then when the flower dies the seeds go out and you can plant a bean stem again. ✓

Thursday 11th March 2021

WALL 4 explains the steps in a process. I can name the steps in a process. I can draw the steps in a process. I can write to explain the pictures. I can add scientific labels to my diagrams.
