

In this DT project, you can focus on:

- Designing a purposeful, functional and appealing product. Decide: what will you make?
- Develop and plan ideas. Can you draw what you want to make?
- Use tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing).
- Evaluate their ideas against their design and ask questions such as: how could I improve this? How could I make it stiffer/stronger/neater?

# What can I make with a milk carton?

## Design Technology Project

This project will need supervision and support to use and handle tools safely!

Draw and plan what you will make.

Can you make a list of the equipment you used?

Can you write instructions for the thing you have made?

Can you give your project 2 stars and a step?

Send a picture into your teacher! Well done!
