

Why is it important to wash our hands?

### When We Wash Our Hands

After using the toilet

Before we eat

After playtime

Before home time

Before playtime

When we arrive at school

After we eat

What does our body need to stay healthy?

Animals, including humans:  
knowledge organiser

Big Idea: What makes humans wonderful?

What are the five senses and what do they do?

| senses  | There are five senses: <b>sight</b> , <b>touch</b> , <b>smell</b> , <b>hearing</b> , and <b>taste</b> .                                               |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| sight   | Your eyes let you see all the things around you.                                                                                                      |
| touch   | Your skin gives you the sense of touch. You can tell if something is warm, cold, smooth or rough without even looking at it!                          |
| smell   | You smell using your nose. Your nose can tell if things smell nice or not nice.                                                                       |
| hearing | Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.                                          |
| taste   | Your sense of taste comes from your tongue. You can tell if something tastes bitter or sweet. You might have some tastes you like and some you don't. |
