

Our Spring Term topic this half term is...

Amazing Animals

In English we will be **exploring non-fiction texts** and writing explanation texts about chicks.

Then we will be looking at '**just so**' stories, finding out how the camel got his hump and writing our own versions for other animals.

In Computing we will be zoologists; collecting data about animals and presenting it in different ways.

In RE we are will be learning about different faith leaders and all about how Chinese New Year is celebrated.

We will be learning new **dance** skills in PE with Mr Sanders.

In art we will be using animals as inspiration to learn new skills in **printing and clay work**.

In music we will be using animals as inspiration to explore **pitch and tone**.

In maths we will be mastering **multiplication and division** before exploring **fractions and statistics**.

As **scientists** we will be investigating animals and asking 'What do animals need to survive?', 'How do they change and grow?' and 'How can we group them?'

We have chicks visiting us in school for two weeks to bring the topic to life!
