

A close-up photograph of a tiger's eye, showing the intricate patterns of the iris and the surrounding fur. The eye is yellow with a black pupil and is looking directly at the camera.

Predator

Homework – Summer 1

Write your own short story or poem from the viewpoint of either a predator or prey animal.

Keep a log of what you eat throughout a day. Think about what food group the foods you eat are from. Also note down the time you eat and see if you can draw that time on your own clock!

Get creative and make a 2D or 3D model of a predator from the animal kingdom.

Write a fact-file of a predator of your choice. Think about what makes the animal a good predator. You could even create your own predator Top Trumps game!

Stretch your legs and go for a walk. Note down all the different animals you spot. Can you create your own food chain for those animals?

If you could be a predator for a day, what would you be? What would you hunt? What features would you have to help you hunt? Where would you live?
