

Summer One Term Year 2

English

We are reading...

Peter and the Wolf

Once upon a time, there was a little boy called Peter who lived with his granddad on the edge of a big forest.

"Don't go out of the garden," warned Peter's granddad, "there is an evil, vicious wolf in the forest."

But Peter went through the gate to play with his friends. Unfortunately, they were quarrelling by the pond.

First the bird said, "You can't even fly!"
Next the duck said, "You can't even swim!"
But at that moment along came....

a cat – a lean cat, a mean cat.
The duck quacked angrily from the middle of the pond.
The bird squawked angrily from the top of the tree.
But at that moment along came....

Grandad! – and he took Peter back into the house angrily!
But at that moment along came....
A wolf!

First the cat spat and jumped up into a tree.
Next the bird shrieked and flew up into the tree.
Finally, the duck tried to swim away....
But at that moment along came....

Peter!
He lowered a rope from the top of the wall and luckily he captured the wolf by his tail.
But at that moment along came....

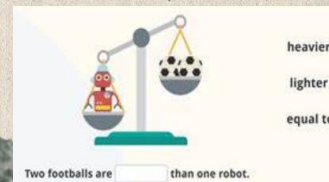

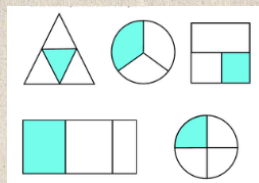

Not one, not two but three hunters, bumbling and stumbling out of the forest.
"Don't shoot," shouted Peter.
"I know where we should take him!"

Finally, Peter, the hunters, granddad, the bird and the cat all took the wolf to the zoo.
Luckily, the wolf was safe behind bars.

Maths

The first unit we shall be covering will be 'Mass, capacity and temperature'. Afterwards, we shall be focusing on 'fractions' and understanding 'how to tell the time'.

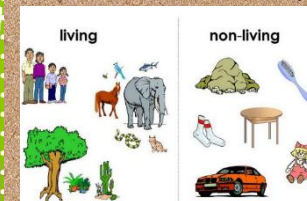

Art

In line with our Geography unit, we shall learn how to draw cityscapes using pencils and pens to draw famous landmarks.

Science

For the first part of the summer, we shall be looking at Animals and Living things. In detail, we shall find out the answers to the key question: What is a habitat and how does it help animals to survive?

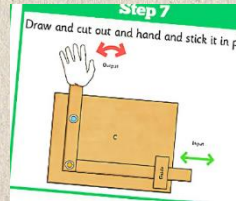

Geography

For Geography, the children will be learning about London and what our capital city is like. We shall go into detail about our geographical location and then zoom out from Keyworth to London, to the U.K. and then the wider world.

DT

For D.T., we shall be looking at mechanisms by learning how to move pictures using levers and slides in relation to our Geography topic. Our D.T. day is yet to be confirmed so more information shall follow shortly.

RE

In R.E., the children will be learning about churches and why they are important to some religions and understanding the Jewish religion: The Torah and Jewish Stories.

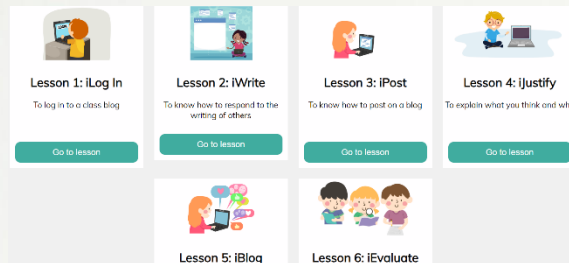

PSHCE

In JIGSAW, the children will be looking at different types of relationships and how to manage them effectively and positively.

Computing

Summer One's unit in Computing is about being able to use a blog and know how to post on a class blog.

PE

In preparation for Sports Day this summer, the children will be learning net and wall games as well athletic practice.
