## Observe, create and edit!

Inspired by our geography topic “Mountains” and our art project on landscape photography, take part in an exciting creative project that encourages you to explore and appreciate the beauty of your local environment!

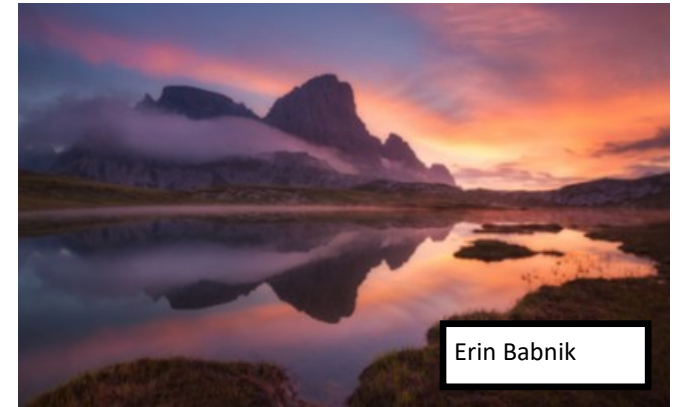

Look at the stunning photographs on this poster - they have been taken by professional photographers. Take your own photograph of a natural or scenic area in or around Keyworth—whether it's a peaceful field, a winding woodland path, or a striking skyline.

Link this with your digital photography skills by using filters and special effects to edit your photograph. Will you make the colours pop (saturate)? Will you enhance one colour? Will you use black & white to add a strong contrast?

***Please print your photograph (up to A4 size, no more than 2) to display in our class at the end of the term when we celebrate our topic work!***
