

What do I already know? Children can identify how animals also have offspring (just like humans) but not all offspring do not look like their adult when born. Children will also understand the basic needs of animals and how these differ to the needs of a human.

Science : YEAR TWO, SPRING I

BIG IDEA: What are offspring?

KEY VOCABULARY

offspring	The child of an animal.
reproduction	The production of offspring. The process of copying something.
survival	The state of continuing to live.
Life Cycle	The processes and stages an animal goes through as it grows and develops.
Processes	The changes an animal goes through in its life cycle.
Basic Needs	The simplest needs a living being/animals needs in order to function and survive.
Growth	The process of getting bigger in size.

What do animals need to survive?

How can we measure an animal's growth?

What stages does an animal offspring go through?
